## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and apparatus for modifying rectangular page data to be recorded in a holographic digital data storage system. Each independent claim identifies the uniquely distinct feature, "for dividing the rectangular page data into a central region thereof and a peripheral region which surrounds the central region, while rearranging the peripheral region to generate a rearranged peripheral region and merging the central region with the rearranged peripheral region to generate modified page data." The closest prior art, Roh (USPN 6,661,725 B2), discloses wherein storing/restoring holographic data and coding/decoding holographic data, the apparatus divides input data into a plurality of groups, each of which includes two binary digits and encodes each of the groups into a 2 by 2 data block wherein a first row of the 2 by 2 data block has the two binary digits and a second row thereof has another binary digits generated by applying a binary differential calculation on the first row; while Hesselink et al. (USPN 6,414,763 B1), disclose digital holographic camera system and method having removable media, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
